

FOSS4G-ASIA 2018

Free and Open Source Software for Geospatial

“Leveraging Free and Open Source for Sustainable Development”

Logo design contest

Call for submissions

FOSS4G conference is an international conference for *Free and Open Source Software for Geospatial* Community. FOSS4G-Asia 2018 aims to bring researchers, professionals and students together with FOSS4G users and developers worldwide on building and nurturing Asian communities to overcome barriers of technology innovation through open source transformation for sustainable development.

FOSS4G-ASIA 2018 Conference will be hosted by department of Town & Country Planning, University of Moratuwa and will be organized by local FOSS4G community with the support of OSGeo.

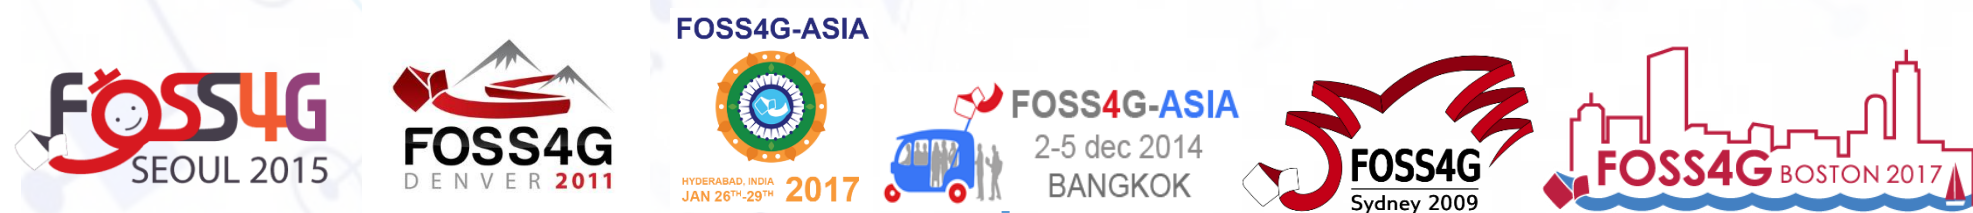

Conference committee is looking for a new visual identity, design an eye-catching logo. The logo of the conference would be used in all promotional materials and will have wide publicity locally and internationally. If you are good at designing a creative, innovative and professional logo, please submit your designs to rangajeewar@gmail.com.

About the logo and design

- The design MUST include elements of the OSGeo / FOSS4G "ribbon" in suitable colours
- Logo must reflect the theme of the conference
- While indicating the relevance to GIS domain, the logo can show the local identity also.
- It must not be similar to other conference logos anywhere in the world
- It should not include any copyrighted materials or anything not belongs to you
- The design should be submitted in a vector graphic format(preferably SVG) with source file and a high resolution sample JPG

Some past conference Logos
