- Interoperability
- FDO Architecture
- New FDO Data Providers
- New Open Source Development Tool:
Maestro

Challenge: Interoperability

Challenge: Interoperability

GITA Annual Technology Survey

Year	Number of utilities surveyed	Proportion with more than one GIS
2002	187	NA
2003-2004	204	1/3 - 1/2
2005	294	60%
2006	386	70%

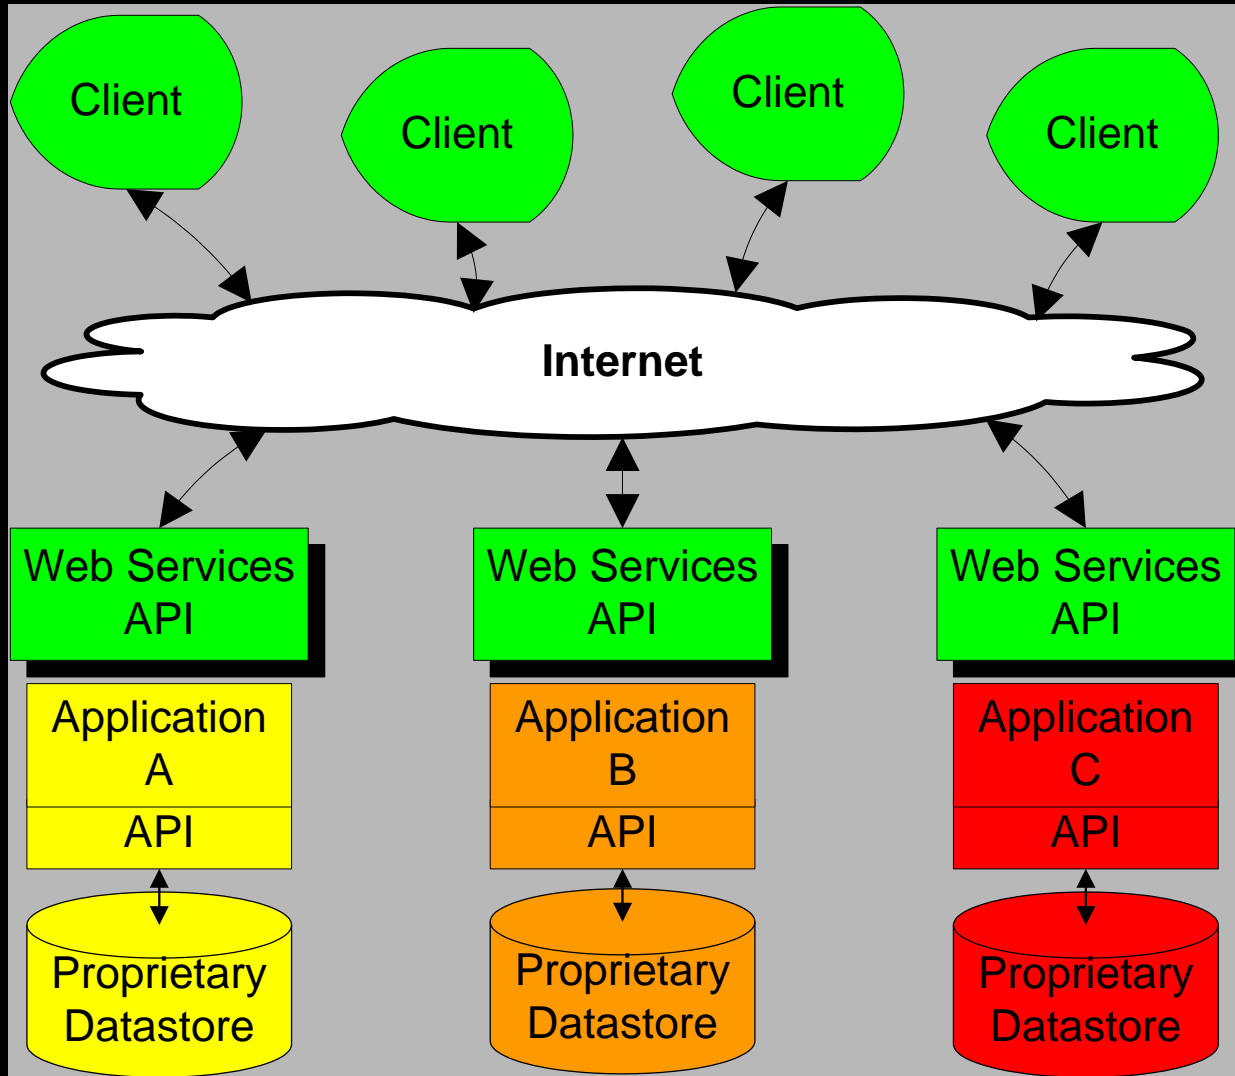

Challenge: Interoperability

Perhaps we need a
Format Non-
Proliferation Treaty!

Architectures for Interoperability

Loosely Coupled

Open Web Services

Open Protocols

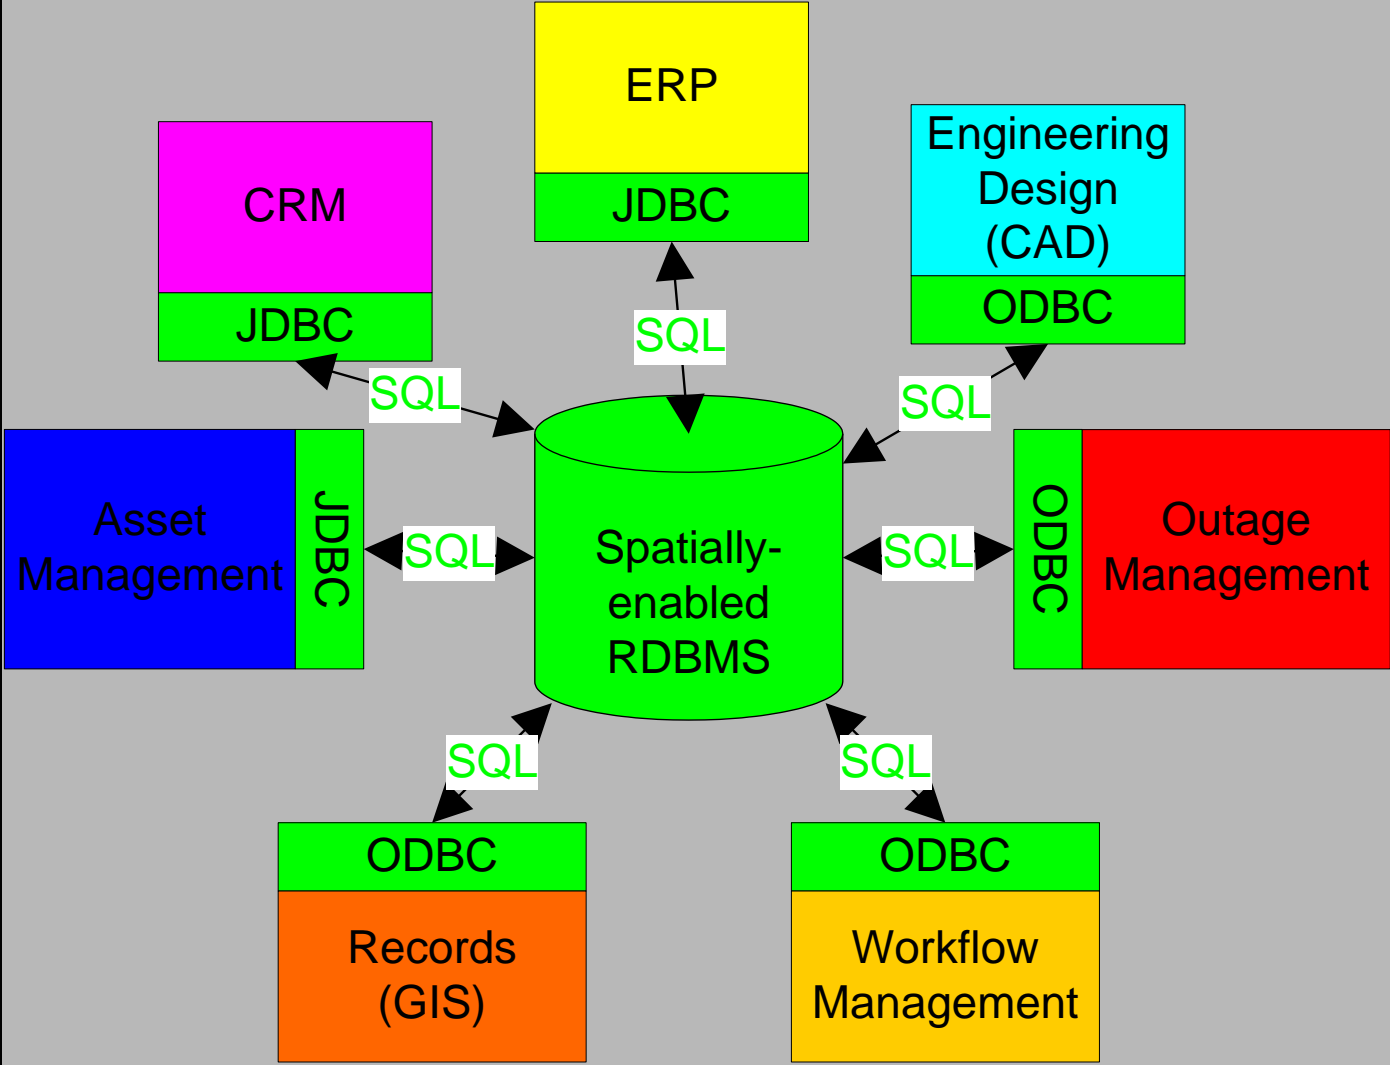

- HTTP, HTML, XML (W3C)
- SOAP, WSDL, UDDI (W3C)
- REST
- Javascript (ecma)

Open Spatial Web Services (OGC)

- WMS
- WFS
- GML

Tightly Coupled

OGC Simple Feature Spec for SQL

OGC SFS

- Points, lines, closed polygons,...

OGC SFS Extensions (Adopted 2007)

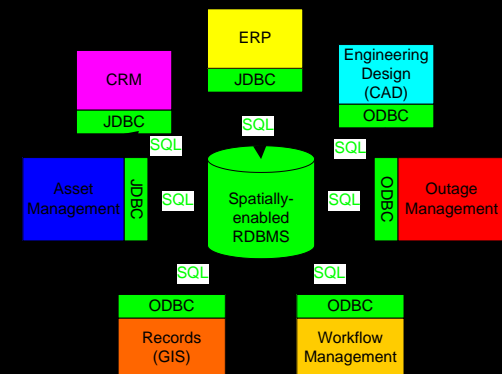

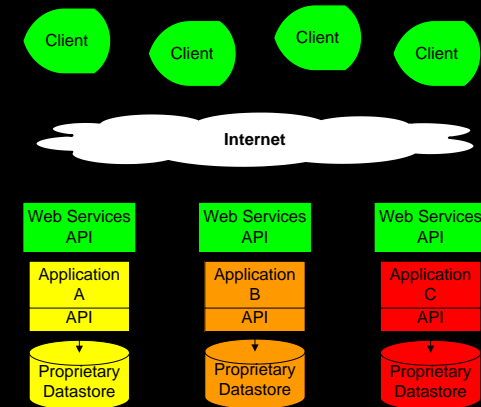

- Cartographic text

Future ?

- Feature Stylization
- Metadata
- Linear topology
- Polygon topology
- Linear referencing systems
- Long transactions

Alternatives for Interoperability

- Loosely coupled
 - Web access to existing(legacy) data sources
- Tightly coupled
 - *Single point of truth*
 - High performance
 - Spatially-enabled RDBMS

Open Source Platform for Interoperability

Open Source Mapping Platform for Data Sharing

MapGuide OS and FDO Statistics

March 2006 to June 2008

▪ MapGuide OS

- 74,000 source code downloads

▪ FDO

- 44,500 source code downloads
- Many data providers developed by 3rd party contributors

Autodesk Contributions to OSGEO

MapGuide Open Source
Web Mapping Platform

mapguide.osgeo.org

FDO
Data Access Technology

fdo.osgeo.org

- 3 Autodesk contributions
- Community contributions
- Unlocking Spatial data access and democratizing coordinate system library

Coordinate System
Library

metacrs.osgeo.org

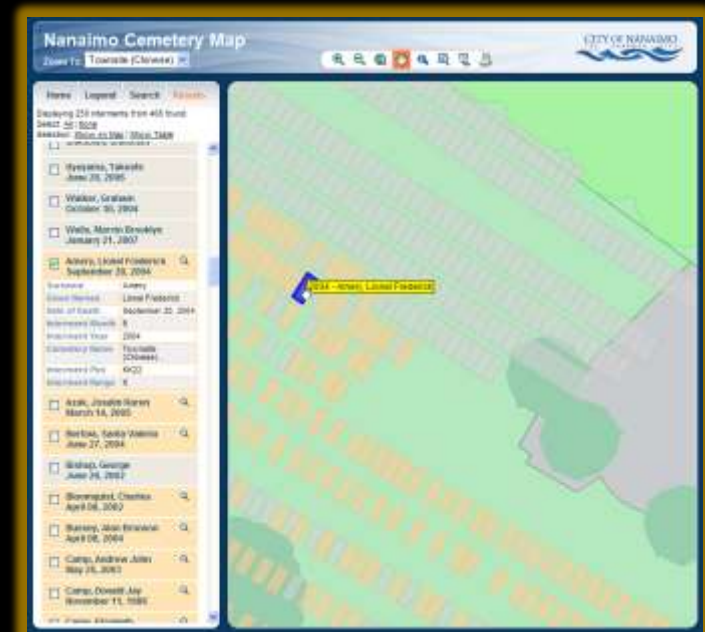

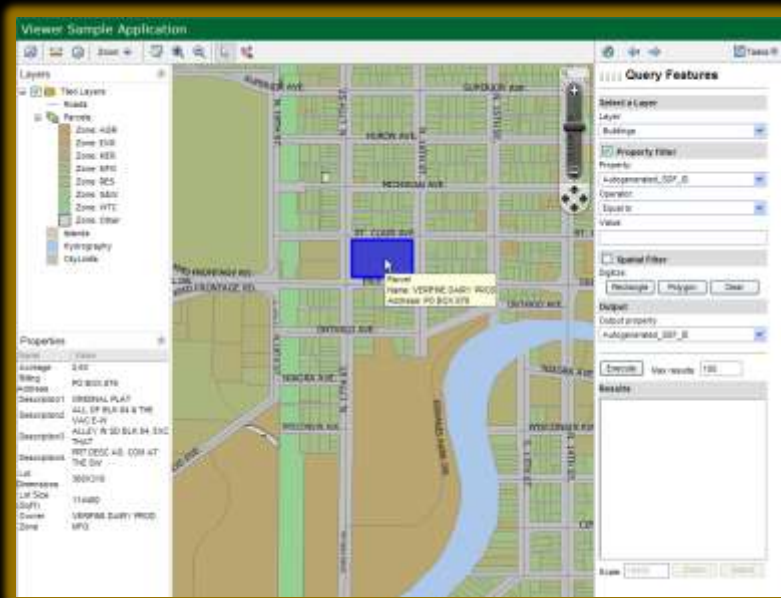

- Free Source Code
- Free Documentation
- Multiple APIs: .Net, C++, PHP, Java

FUSION

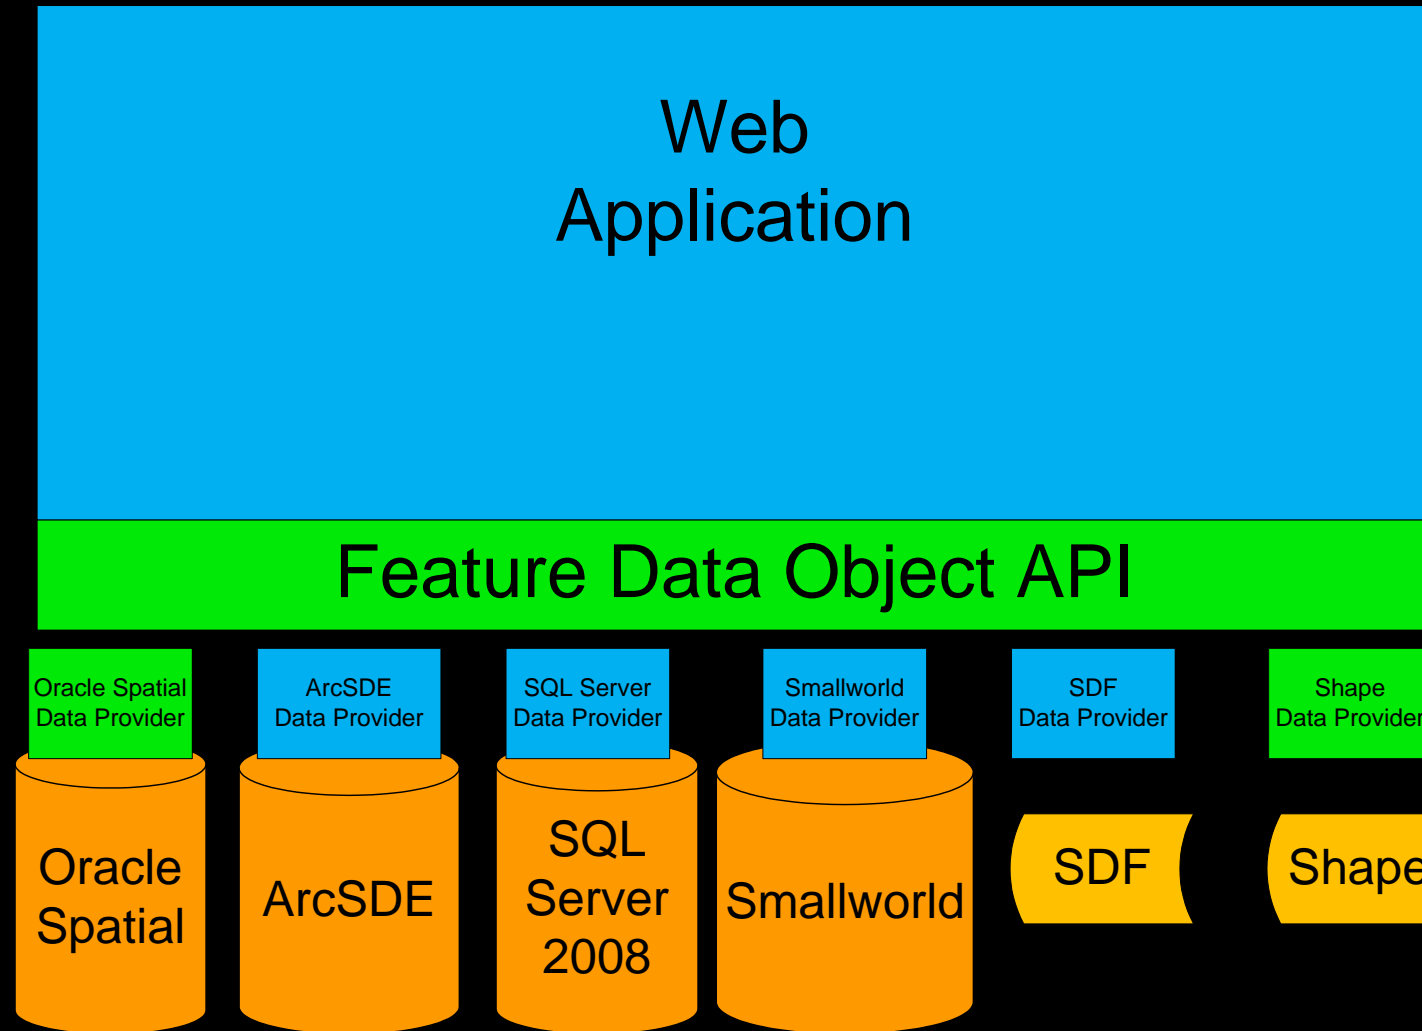

- Customizable library of web mapping tools and controls
- Created through open source
- Developed by DM Solutions

MapGuide Open Source layout...

... and with Fusion

FDO: Geospatial Data Access Technology

Autodesk Certified Providers

Providers from 3rd Party & Open Source

Providers supporting **multiple** formats

 ODBC MS Access, Excel and Oracle	 Raster 15+ raster formats	 ArcSDE [®] Oracle and SQL-Server
--	---	---

 150+ vector and raster formats	 OGR 25+ vector formats	 GDAL 25+ raster formats
---	--	---

Providers supporting **single** format

 SDF	 Microsoft SQL Server 2005	 Microsoft SQL Server 2008
 SHP	 ORACLE	 GE Energy Smallworld
 WMS		
 WFS		
		

 PostGIS	 ORACLE	 Microsoft SQL Server 2005
 SuperMap	 IBM Informix Dynamic Server	 KML

New FDO Data Providers

- Announced yesterday at FOSS4G Capetown
- Autodesk FDO Providers
 - FDO Data Provide for GE Smallworld
 - FDO Provider for Microsoft SQL Server 2008
 - Will be available as open source project on OSGEO
- Community FDO data providers
 - IBM Informix
 - KML
 - PostGIS

Development Tools

- **MapGuide Studio**
 - Closed source commercial product developed and supported by Autodesk
 - Desktop development application
 - Supports Autodesk proprietary formats: DWG and DWF in addition to FDO data sources

- **Web Studio**
 - Web-based
 - Open Source
 - Developed by DM Solutions

Maestro

- Consensus in OSGEO community that there was not longer active development for Web Studio
- Developed by Kenneth Skovhede, Geograf, Denmark
- Web-based MapGuide OS application development tool
- Written in C# for .Net, runs with Mono on Linux
- Targetted on developers
- Supports 70-80% of MapGuide Studio functionality
 - Supports FDO data sources (does not support Autodesk proprietary formats)
 - Also supports additional functionality, for example scans a directory for map tiles
- Source available at www.osgeo.org/mapguide

Summary

- ***MapGuide Open Source/FDO*** – Open source platform for interoperability
- **New FDO data providers from Autodesk and 3rd parties**
- ***Maestro*** provides a web-based open source web application development platform.
